## Education

2021 – Present	<b>BS (Software Engineering)</b> <i>PMAS Arid Agriculture University Rawalpindi</i> CGPA: 3.08
2018 – 2020	<b>FSC (Pre-Engineering)</b> <i>Superior College Mianwali</i>

## Projects

### Connectify (Xml+Java Android+Firebase)

An Android-based real-time chatting application utilizing Firebase for seamless and secure communication. It supports instant messaging and real-time notifications. Connectify ensures a smooth user experience with its reliable backend infrastructure powered by Firebase.

### Portfolio (React JS)

My portfolio showcases my work through a dynamic and engaging interface built with React.js. It features smooth AOS animations for a visually appealing experience and a typewriter effect to highlight key information.

### Bank Management System (Java)

A desktop application built in java using AWT and Swing for front end and SQL for database.

### Contact Book (C++)

Console app built in C++ using doubly link list data structure for storing contacts in files.

### Bank Management System (C++)

A console app using all the crud operations and transactions.
